# Field Engineering

The Rig Systems Aftermarket Field Engineering team is a specialized group of mechanical, electrical and controls engineers, available to solve the most complex engineering requirements. Whether you are purchasing new equipment or upgrading your existing equipment, the NOV Field Engineering Team will be on hand to support you no matter how unusual and unique your requirements are.

As the Original Equipment Manufacturer (OEM) we have the in-depth knowledge of your equipment. We have thousands of engineers supporting our 10 Field Engineering teams around the globe, to ensure that we are proposing and providing the best solution to meet your specific requirements.

Customers who contact NOV Aftermarket Field Engineering will receive;

- An assigned and dedicated project lead who will review the project with the customer.
- Initial technical content and budgetary proposal for the project - our engineers can ensure that we provide you with the best information we can up-front.
- Additional support by deployment of dedicated personnel onboard your asset to perform technical surveys, should the requirements and the complexity of the project require it.
- A detailed technical and commercial proposal.
- A partnership with NOV through all design, manufacturing, test and delivery phases.
- A managed transition through the installation and commissioning phases onboard the rig.
- A full and agreed Documentation Package containing drawings, specifications, accreditations and all instructions necessary to maintain your equipment in premium condition.
